CHEMICAL CONCERN AT MINI RODINI

Mini Rodini's chemical concern reflects an awareness of how chemicals affect the environment and human health in the local production countries as well as our sales markets and consumers. For every Mini Rodini design and product development, chemical use is carefully considered. The product is always adapted to minimize the risk of harmful chemicals being used, through electing sustainable materials and certifications consciously.

Nevertheless, the base requirement and most important part in the chemical risk management of our company, is that this Mini Rodini RSL is complied with just as well as REACH and the local chemical laws in the production- and sales market countries.

REACH LEGAL OBLIGATIONS

Mini Rodini and its suppliers and partners are required to comply with the European Chemicals legislation REACH in force since 1st of June 2007.

The essence of REACH is to ensure a high level of safety for environment and human health, focused on substances in general and hazardous substances in particular, that are manufactured in, imported to and used in EU. It is the responsibility of all manufacturers, importers, distributors and users to ensure the substances they trade or use doesn't pose any risk to environment or human health.

Duty to inform

Since 28th of October 2008, all EU-actors that professionally manufacture, import, sell or distribute products are legally obliged to inform their customer about the presence of the candidate substances in the products they sell. This includes that each supplier from their side subsequently need to inform Mini Rodini if they know if any of the candidate substances are present, and in what value, for each style per shipment.

THE MINI RODINI RSL

The Mini Rodini RSL is in accordance with REACH as well as additional voluntary criteria. It is costume made for Mini Rodini and covers the full assortment of products. The value Mini Rodini requires its suppliers to follow is the "Mini Rodini Limit value" stated below.

The Mini Rodini RSL will be updated in accordance to each update of REACH and coming additional and stricter demands from the industry and Mini Rodini. Every update will be sent out continuously to each supplier for new signature and compliance.

RESPONSIBILITY OF THE PARTIES

In case of known difficulty to comply with the limit values, prohibition of substances or any other requirements in this agreement, this must be informed to and discussed with Mini Rodini to find a substitution or other applicable solution.

For chemical tests, requested test method and test equipment stated in each chapter of RSL must be used. If other test method or equipment is used than what RSL demands without approval from Mini Rodini, supplier needs to remake the analysis according to RSL at their cost.

Requested detection limit must be followed. If not possible, supplier must inform Mini Rodini and ask for confirmation.
